But the Margins Tell a Different Story
Color shows the Democratic or Republican margin in each county, revealing where races were won by small margins rather than true landslides

A closer look into the elections from 2000-2024

Cumulative vote totals across elections can exaggerate how dominant candidates appear.

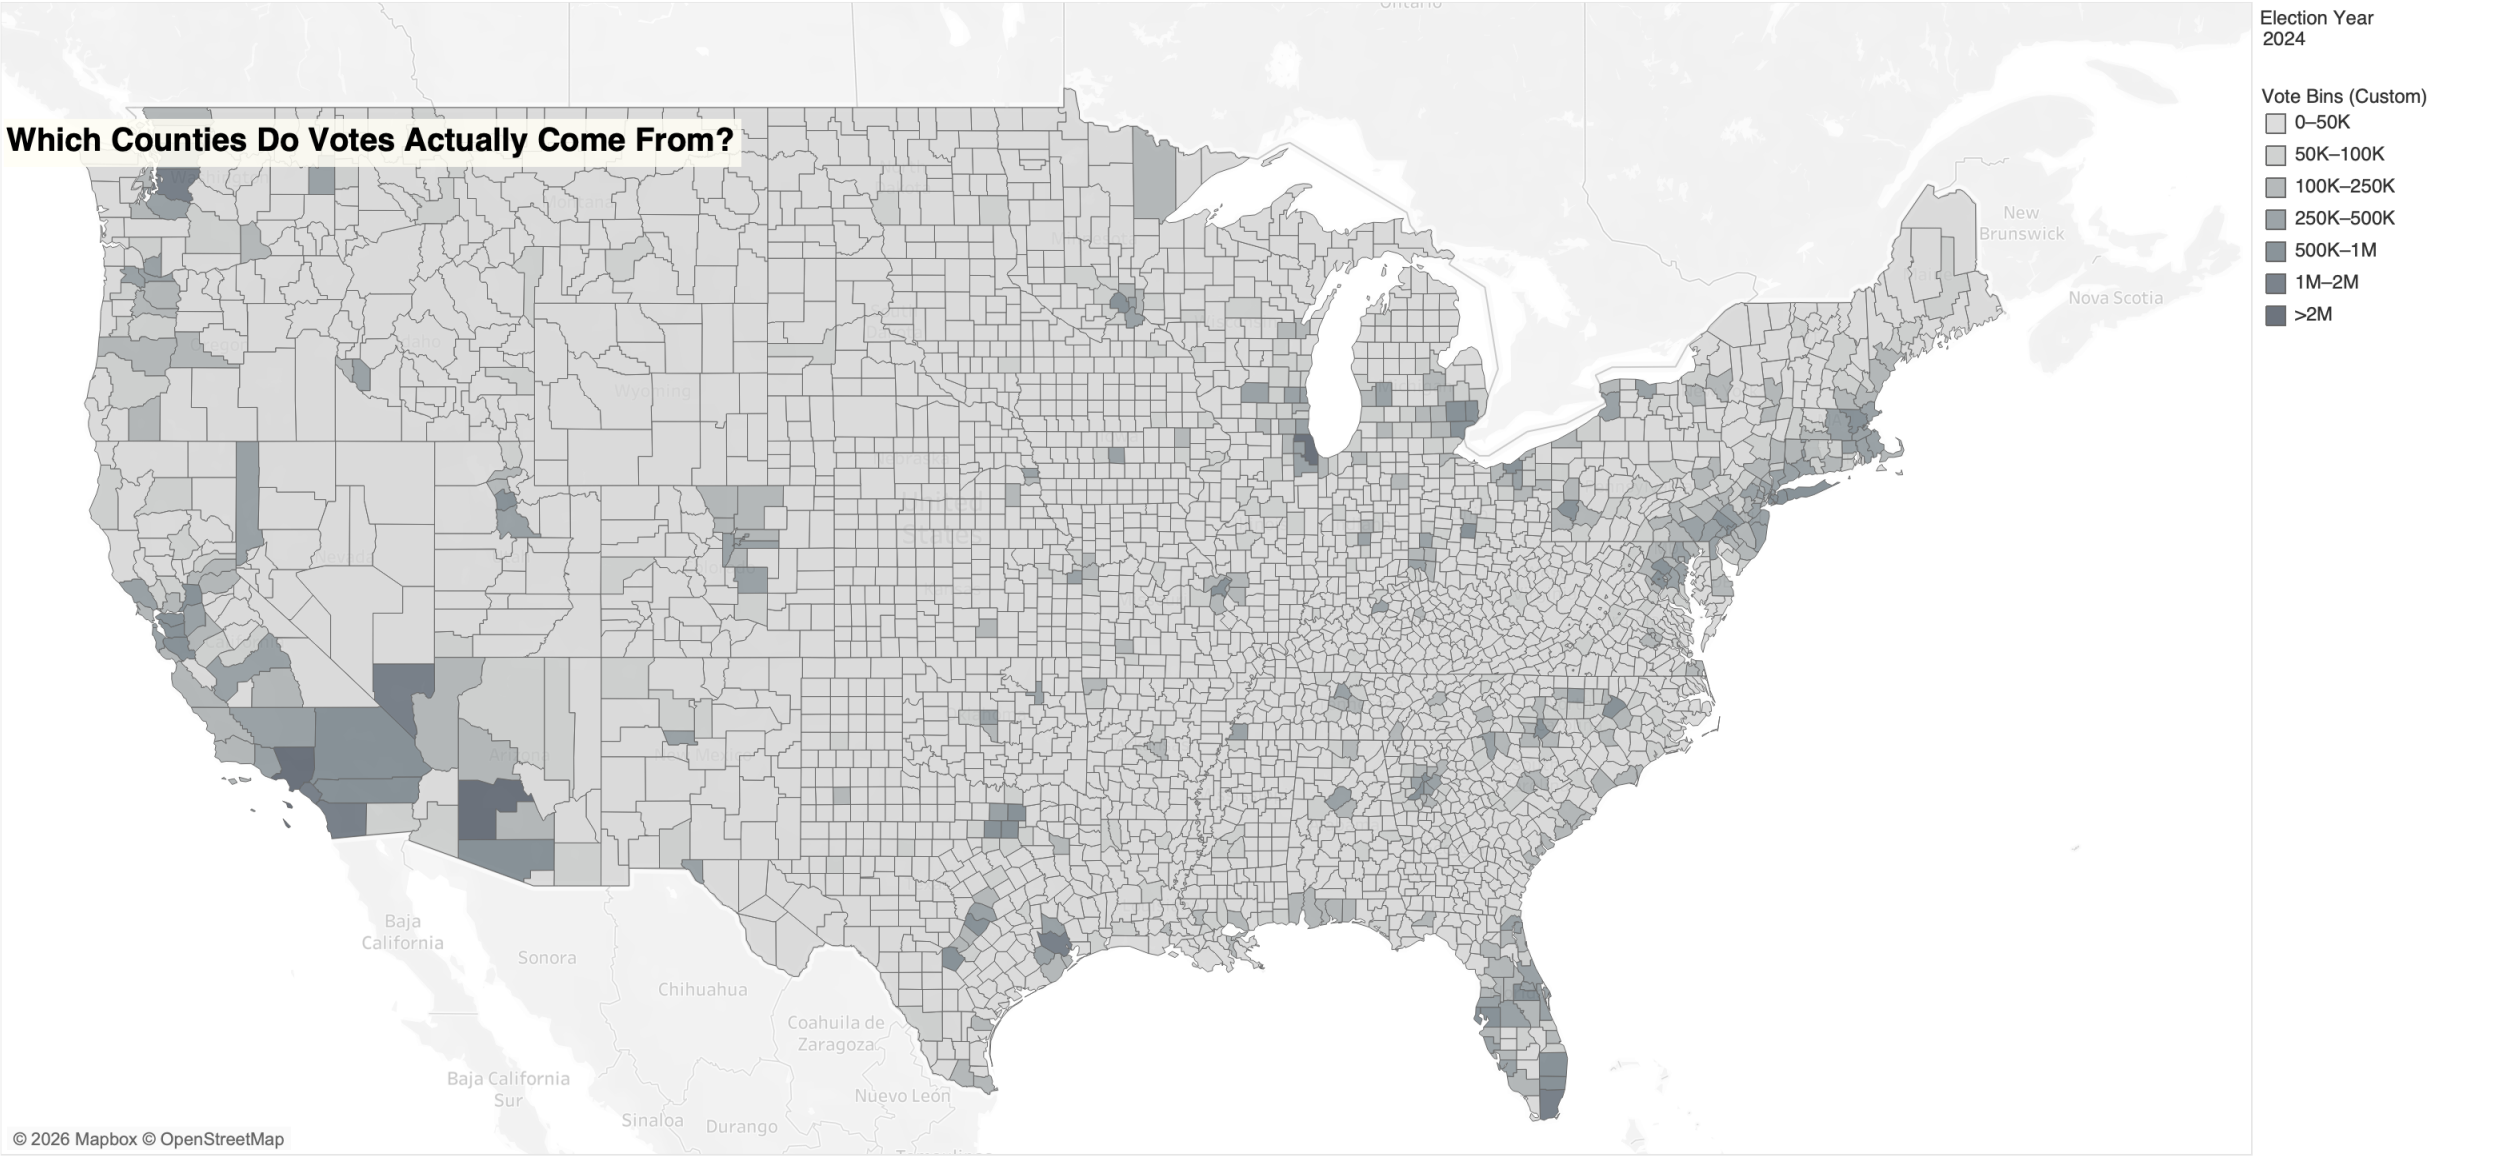

Stacked bars show how each candidate's total votes were accumulated across election years

CONCLUSION

While elections may look like landslides from a distance, the reality is much closer and more competitive than it appears.

- Maps emphasize land, not voters
- Many “wins” are actually close margins
- Large vote totals can be misleading
- And true landslides are relatively rare
