

World Cup Analysis from 1930 to 2014

File created on: 15/7/26 4:59:53 pm SGT

1998 (France) and 2014 (Brazil) are the highest-scoring tournament in World Cup history

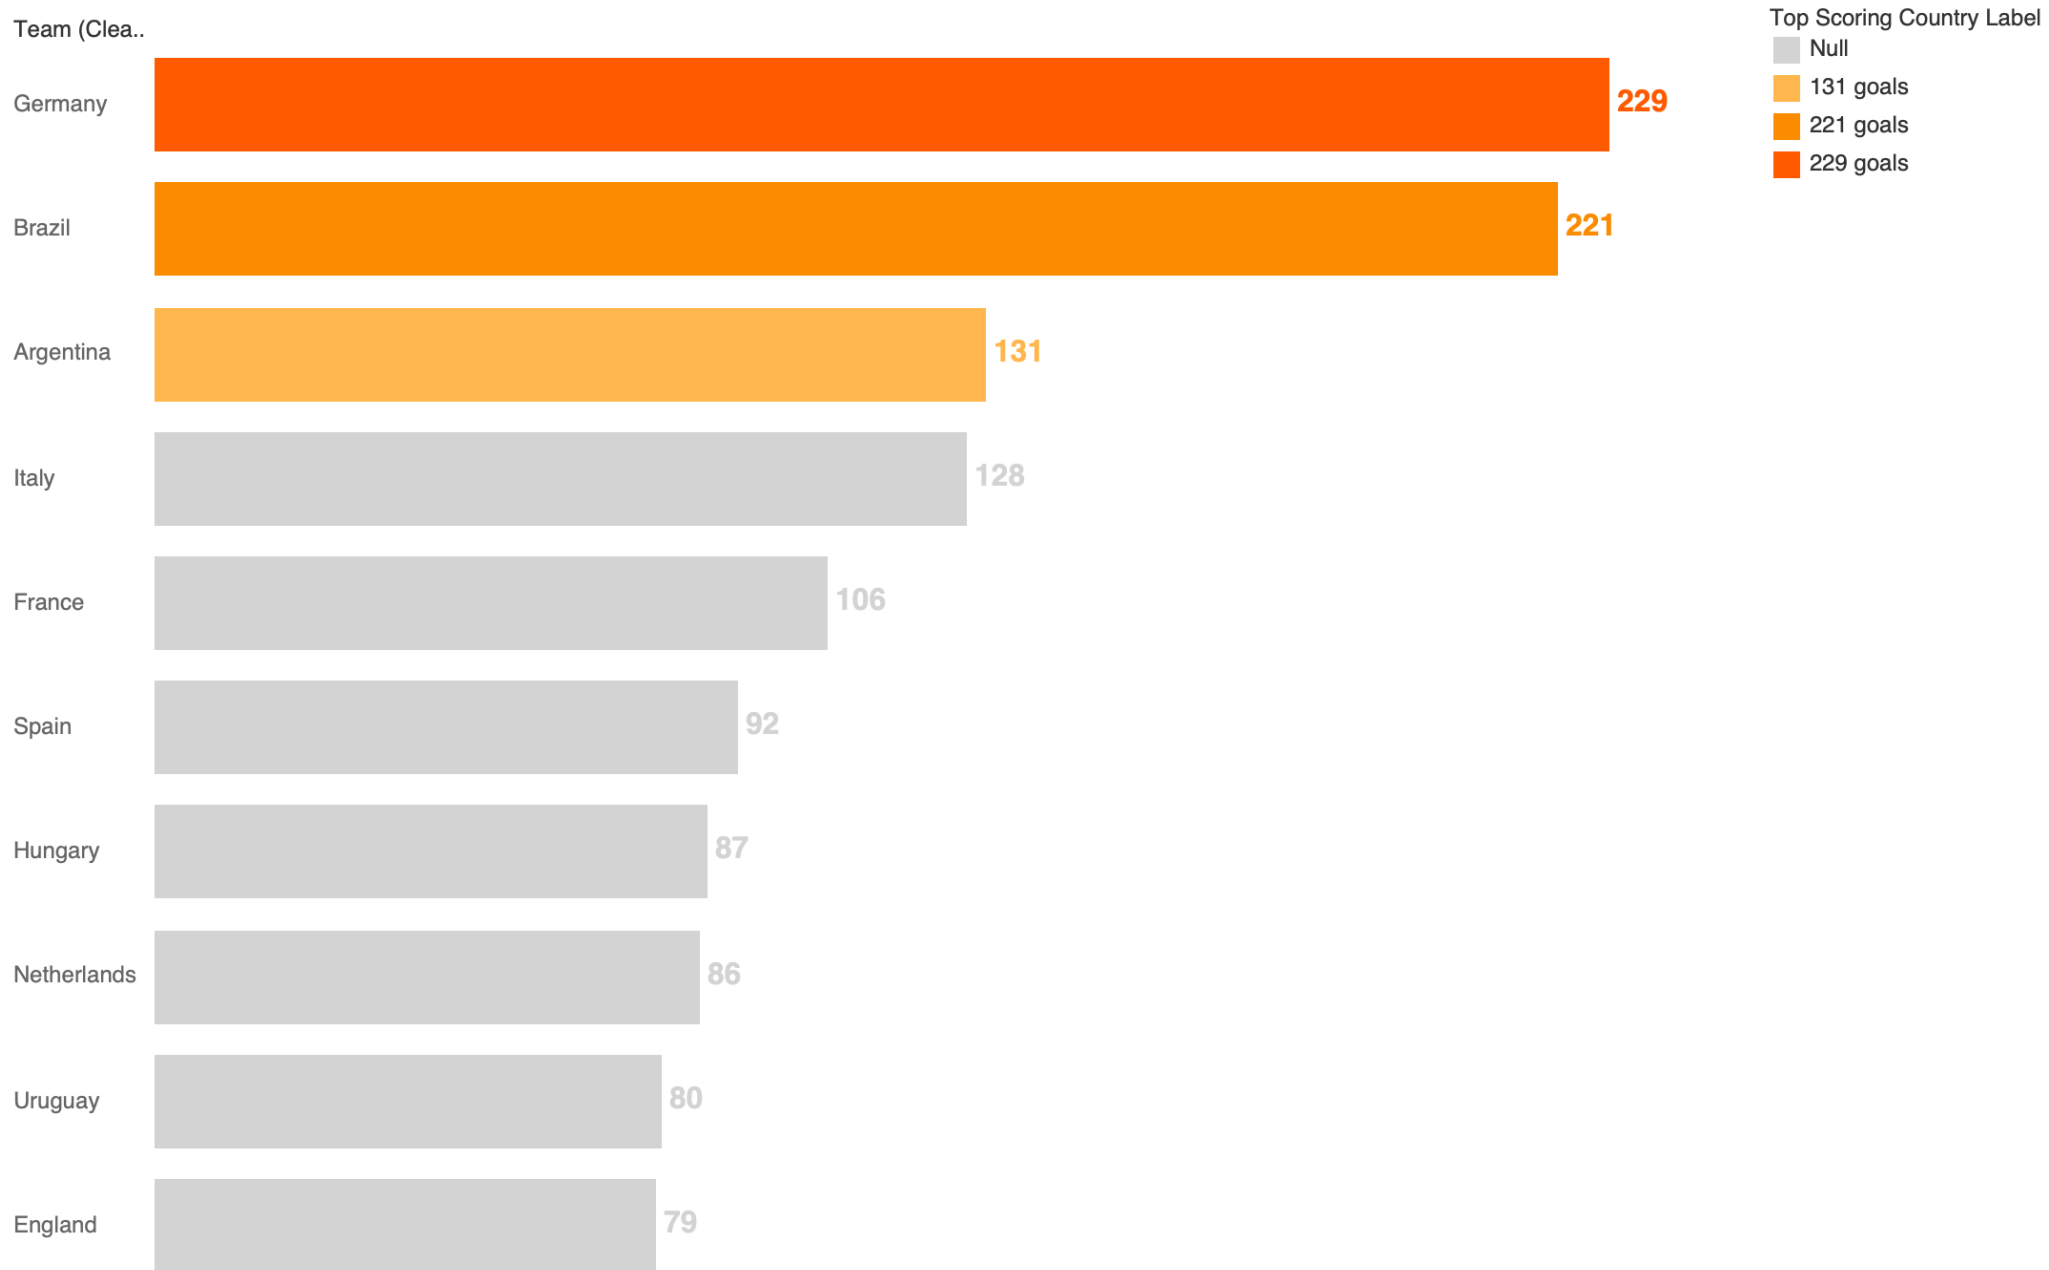

Both tournaments recorded 171 total goals

The 1998 World Cup in France and the 2014 World Cup in Brazil are tied as the highest-scoring tournaments in the dataset, with 171 goals each. This shows that peak scoring has occurred across different tournament eras, not only in the modern game.

Germany is the highest-scoring country in World Cup history

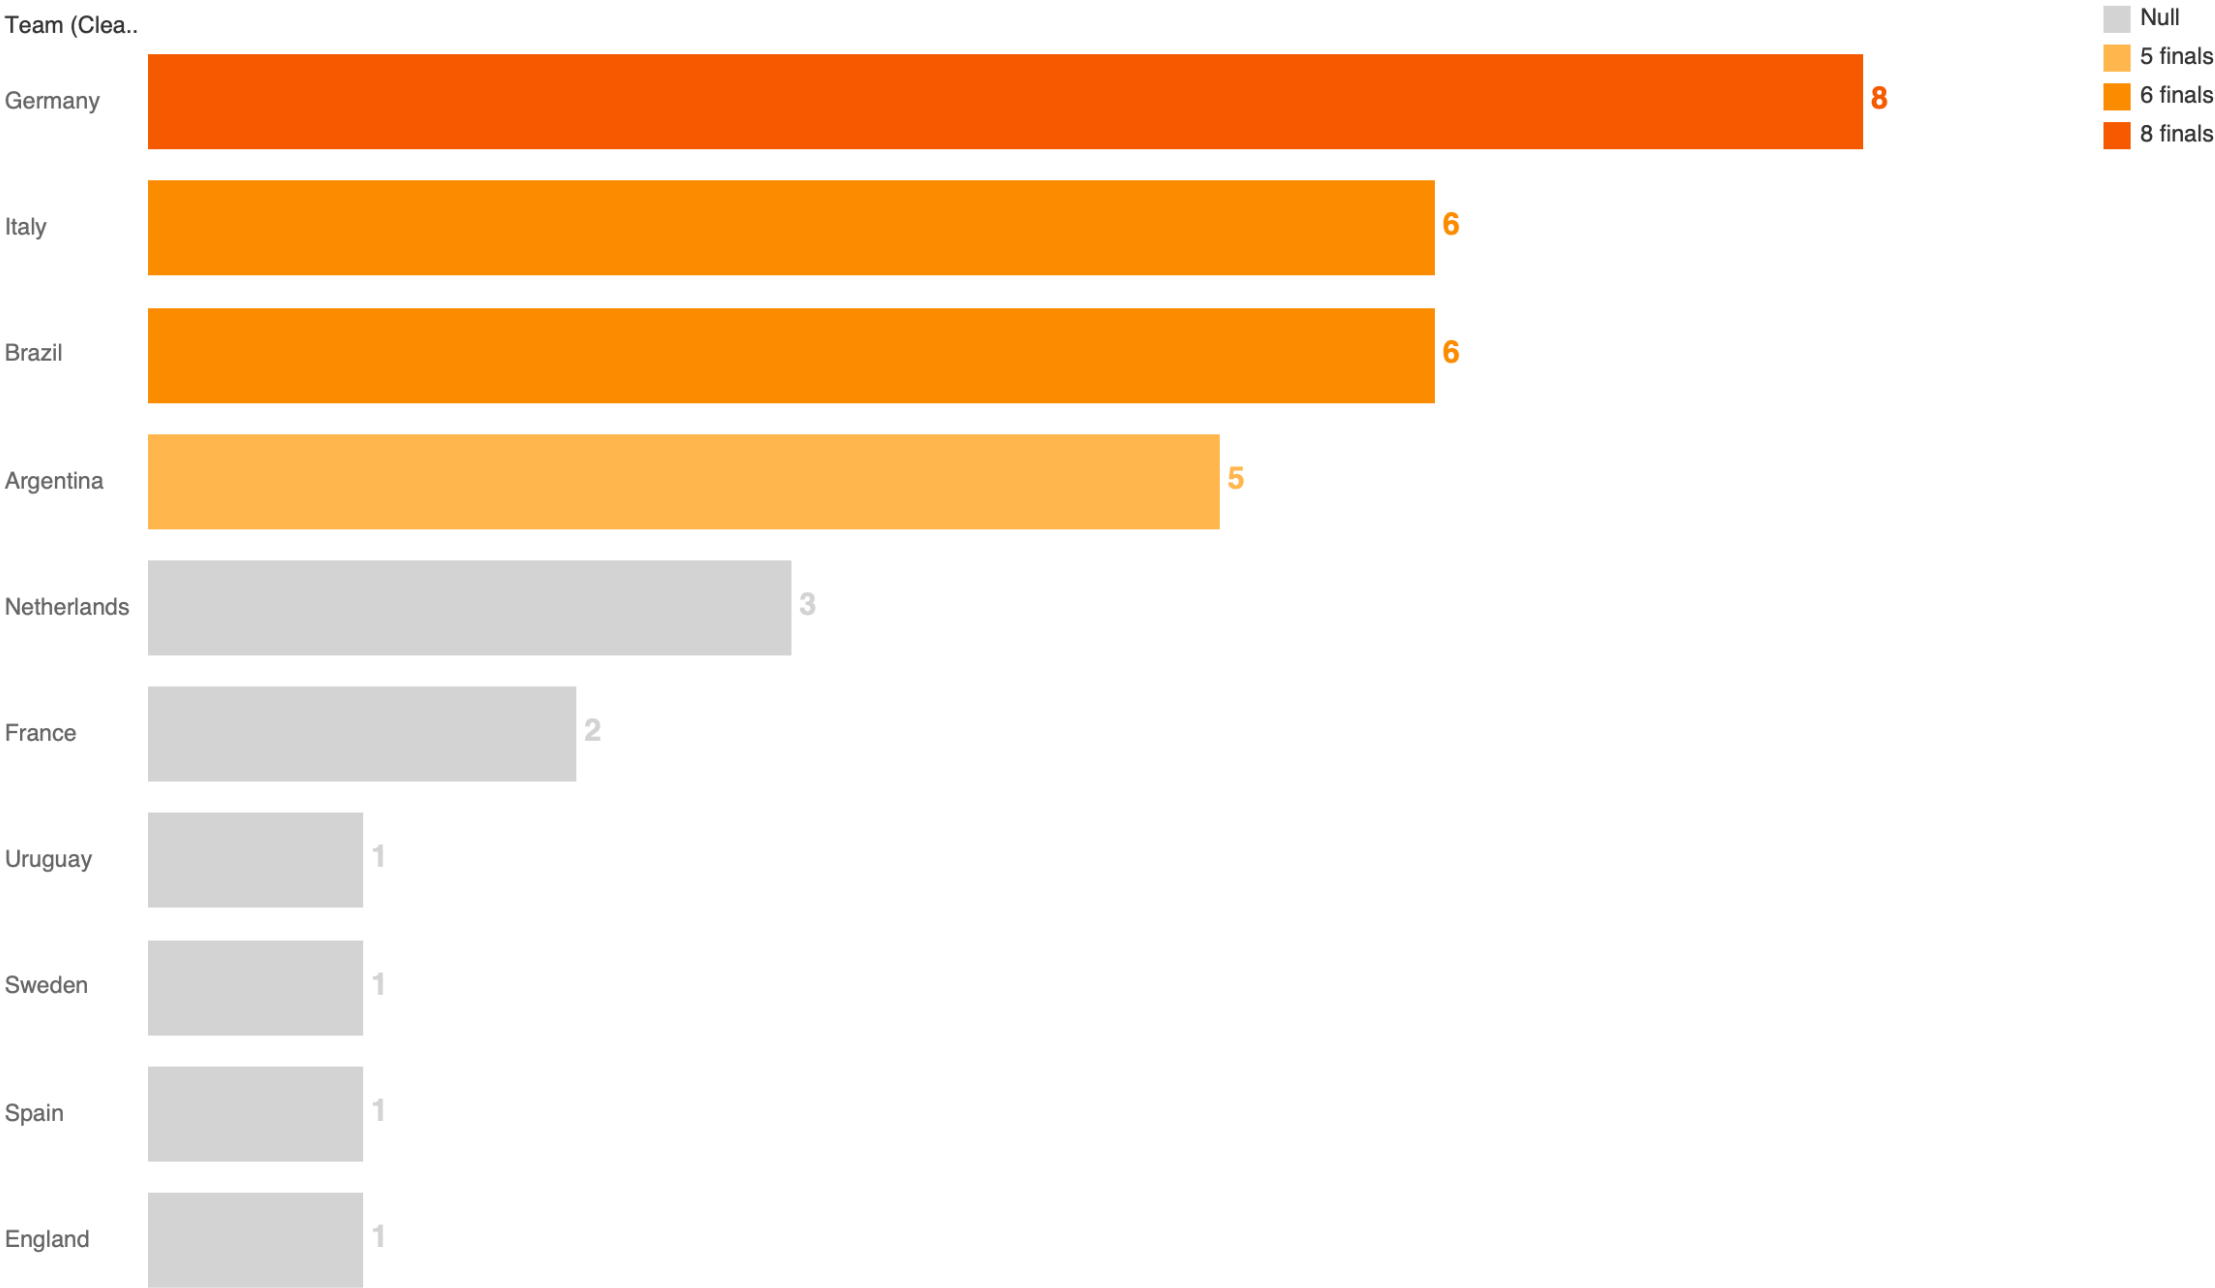

Top 10 countries by total World Cup goals scored

Germany leads all nations in total World Cup goals, closely followed by Brazil, reflecting sustained attacking strength across multiple tournament eras. While countries like Argentina and Italy also rank highly, the gap highlights how consistent qualification and deep tournament runs contribute significantly to overall scoring totals.

Germany leads all nations with 8 World Cup Final appearances

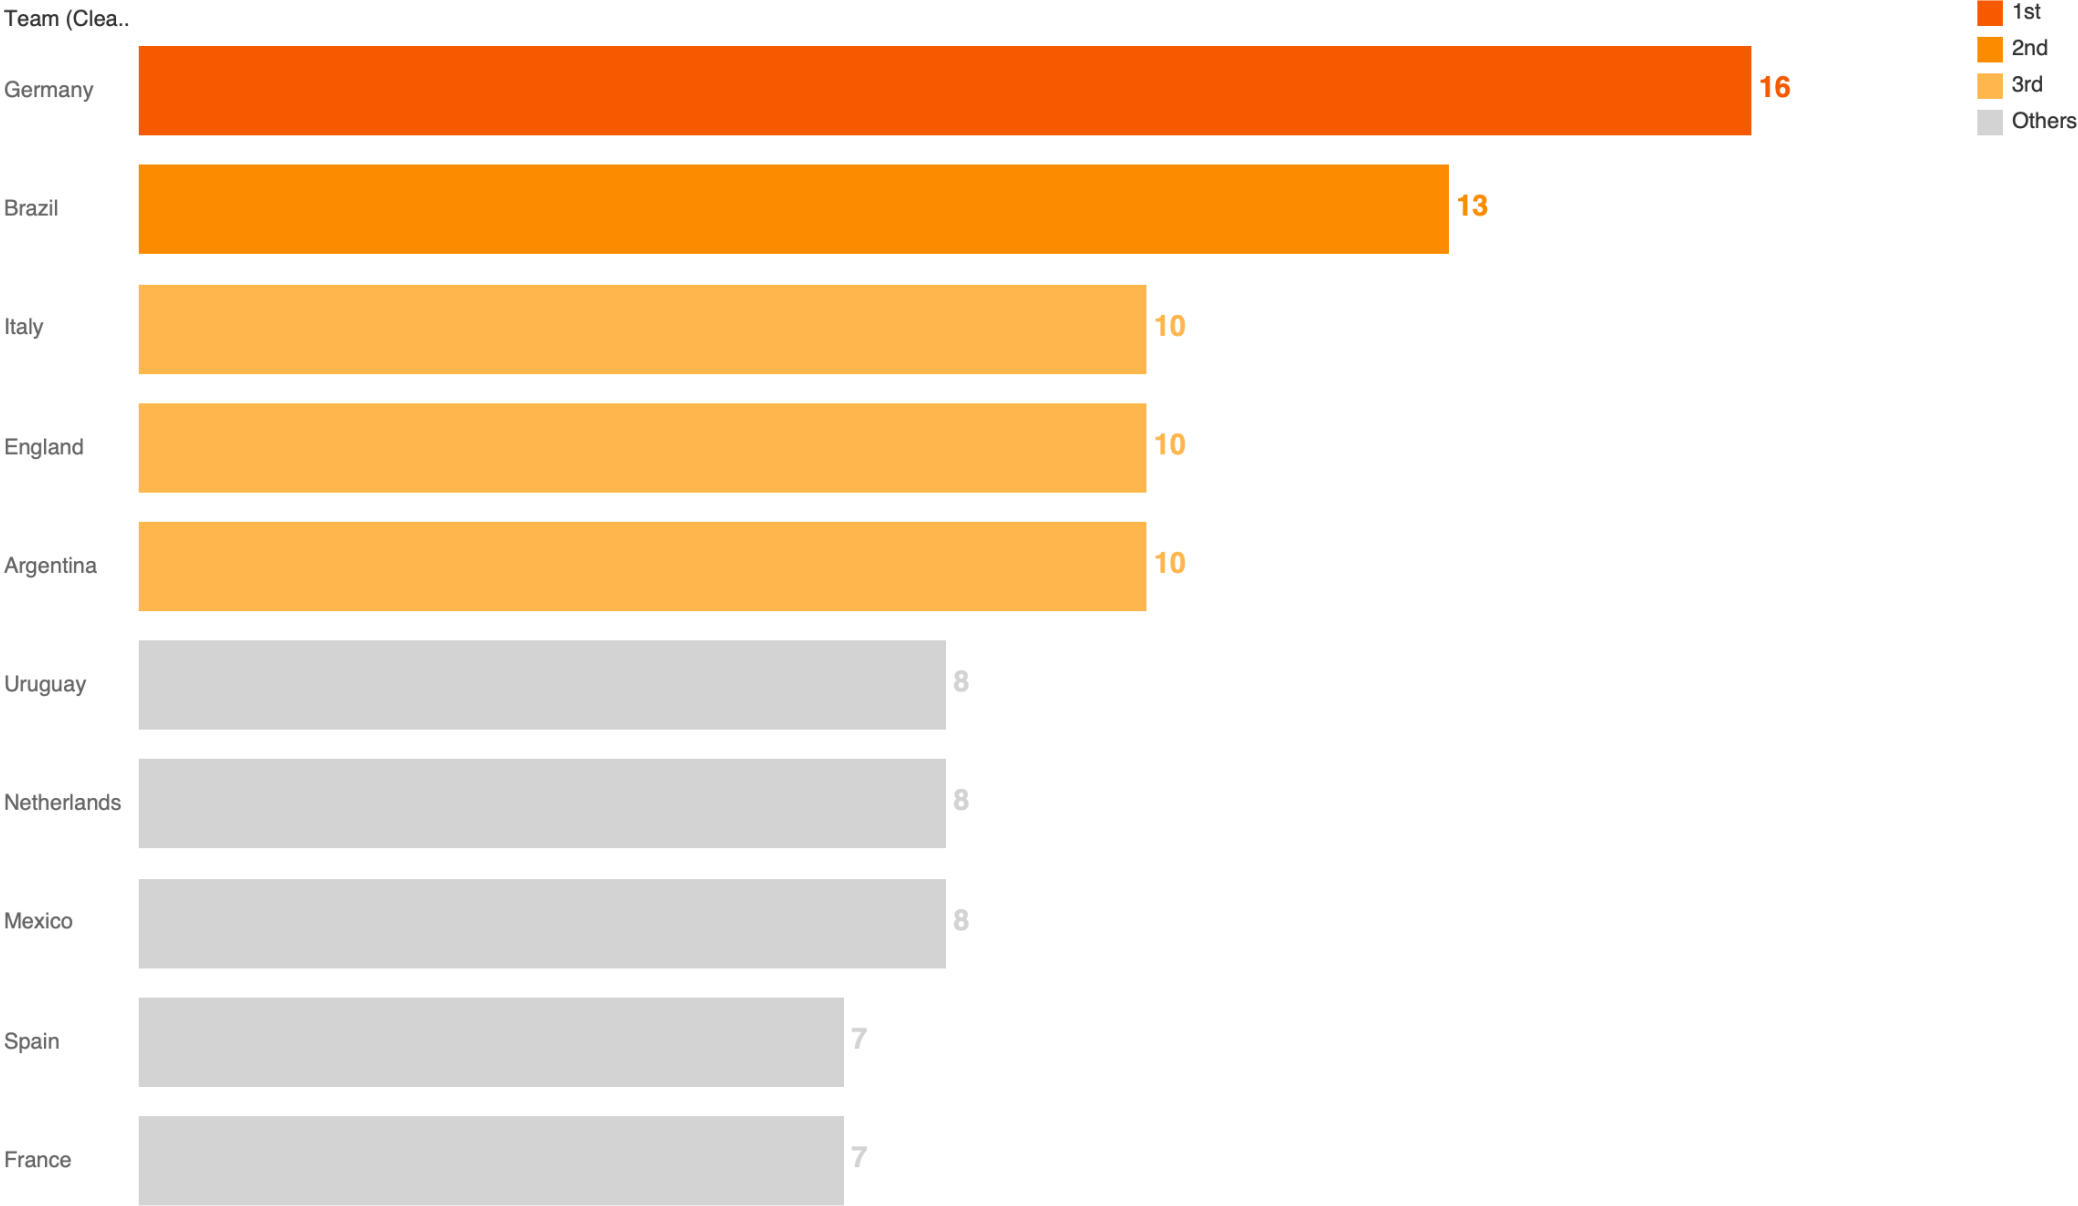

Italy and Brazil follow closely with 6 appearances each

Germany's record of 8 final appearances highlights sustained dominance across multiple eras, while Italy and Brazil remain close contenders with 6 appearances each.

Germany leads all nations with 16 knockout-stage appearances

Brazil follows as the most consistent tournament performers

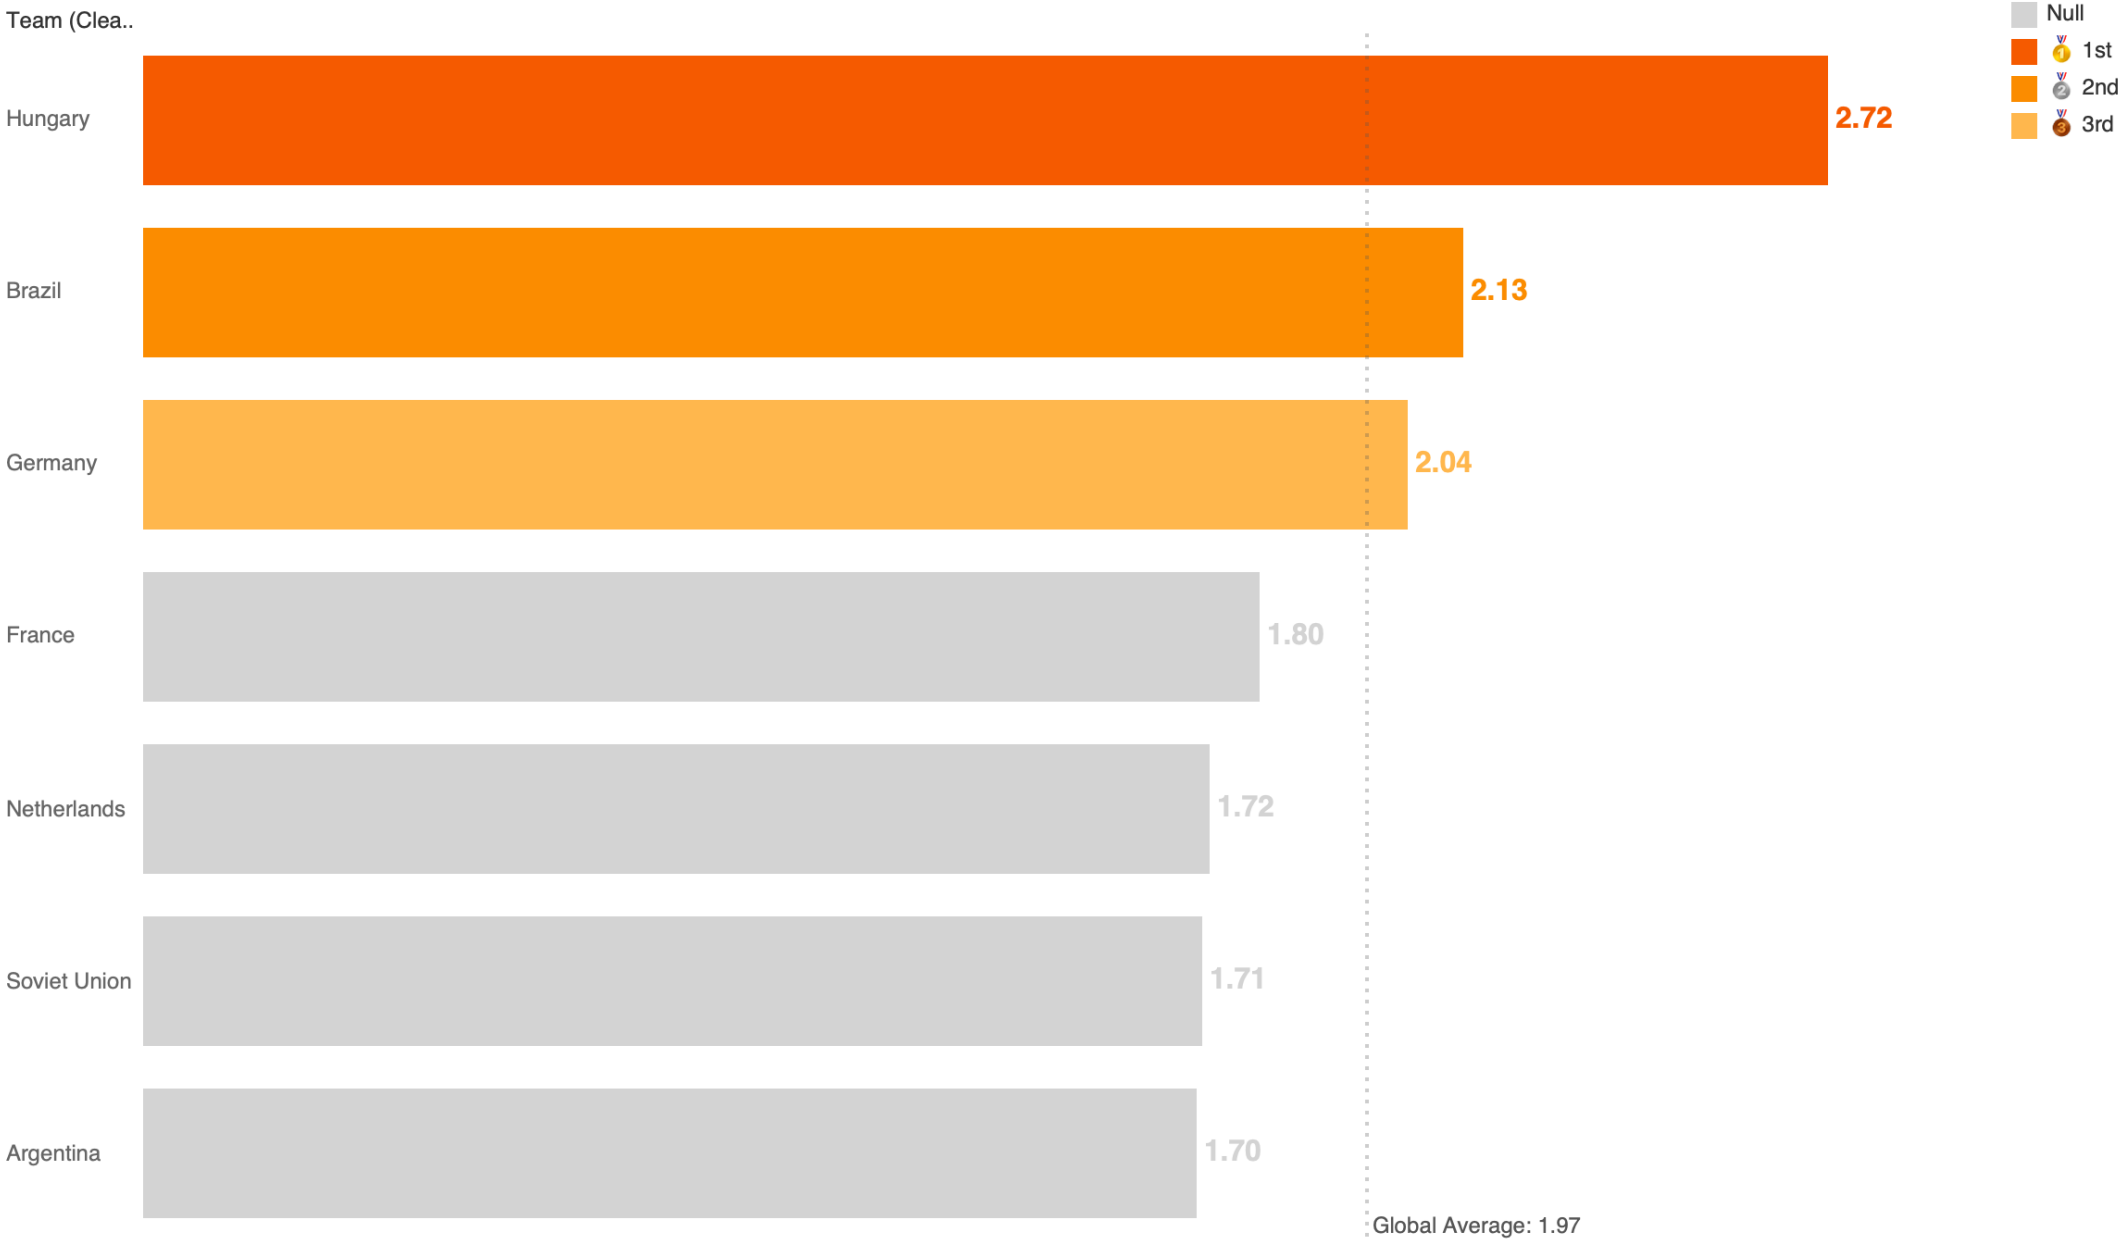

Germany has reached the knockout stage 16 times, more often than any other country, reflecting unmatched consistency across multiple World Cup history. Brazil follows with 13 appearances, while Italy, England, and Argentina form a strong second tier with 10 appearances each.

Important Note: The knockout-stage analysis uses only standard elimination rounds, so tournaments with non-standard historical formats, such as 1950, are not treated as knockout appearances unless explicitly labeled as such in the data.

Hungary leads all nations in World Cup scoring efficiency

Among teams with more than 20 matches, Brazil and Germany combine high efficiency with sustained participation

Hungary records the highest goals-per-match ratio (~2.7), highlighting an exceptional attacking peak in earlier tournaments. However, Brazil and Germany combine strong scoring efficiency (~2.1–2.4) with significantly more matches played, indicating sustained performance across multiple World Cup history.

Note: Only countries with ≥20 World Cup matches are included to ensure meaningful comparisons.
